

## Nicolas Alejandro Venzmer

---

Martinez, Buenos Aires, Argentina • nicolasvenzmer@gmail.com • (+54) 11-5488-9200

### Education

#### Universidad Argentina de la Empresa (UADE)

Bachelor's Degree in Information Technology Management

Buenos Aires, ARG

December 2023

#### Udemy

The Complete 2025 Web Development Bootcamp

Buenos Aires, ARG

March 2025

### Professional Experience

#### Niuro

Remote

#### Full Stack Engineer

Present – May 2025

- Contribute to Application Lifecycle Management (ALM), including requirements gathering, design, development, implementation, deployment, and solution support for a full-stack automotive product.
- Design, develop, and maintain cloud-based applications and APIs using React, TypeScript, Node.js, AWS Lambda, and CI/CD pipelines (GitHub Actions), applying DevOps principles.
- Ensure application quality, security, and reliability through unit, integration, and end-to-end testing (Playwright), code reviews, troubleshooting, and performance optimization, collaborating closely with business stakeholders and clients.

#### Act Like Me

Remote

#### Frontend Engineer

May 2025 – February 2025

- Led frontend application design, development, and implementation using Next.js 13, TypeScript, and React, delivering secure, responsive, and maintainable web applications.
- Implemented state management, reusable components, and API integrations, while enforcing clean code practices, performance optimization, and long-term maintainability.
- Ensured security and data protection by implementing authentication and authorization mechanisms (NextAuth, middleware-based route protection), supporting deployment processes and mentoring a junior developer.

#### R/GA

Buenos Aires, ARG

#### Software Engineer

March 2022 – November 2024

- Designed, developed, and maintained web applications and API-driven solutions using Next.js and React, modernizing platforms and integrating Contentful CMS as part of ongoing application support.
- Built automation and integration solutions including a customer-facing chatbot and an internal Slack bot using Node.js, MongoDB, and external APIs, improving operational efficiency and user access to data.
- Delivered data-driven internal applications, integrating third-party platforms (Apple, Amazon, Google) and collaborating with cross-functional teams to ensure reliable deployment, troubleshooting, and high-quality UI/UX.

#### Globant

Buenos Aires, ARG

#### Data Architect Intern (Trainee)

September 2021 – March 2022

- I completed a Data Architect Trainee program, where I engaged in comprehensive training covering the following topics: Linux / Python Programming / Data Modeling & Cloud Technologies / Hadoop Ecosystem / Apache Spark

### Skills & Interests

**Technical:** ReactJS, JavaScript, TypeScript, NextJS, Redux, Zustand, React Query, MUI, Tailwind, MongoDB, PostgreSQL, Google Cloud, Docker, NodeJS, Express, Stripe, AWS, Dbeaver, Retool, Hono.

**Language:** Spanish (Native), English (Advanced - B2), German (Basic - A1)

**References:** [Carlos Esparagoza](#), [Nicolas Rodriguez](#)
